**PRESS**  
RELEASE

**Kaeser expands its blower range with Pillaerator acquisition**

**Kaeser Compressors recently expanded its range of blowers with the acquisition of Pillaerator GmbH. The inclusion of this range of turbo blowers significantly expands Kaeser's offering to the water and wastewater industry sectors.**

With the recent acquisition of Pillaerator GmbH, Kaeser has added turbo blowers to its range of rotary lobe and rotary screw blowers. This action significantly expands Kaeser's offering for the water and wastewater industry sectors, as well as other large flow, low pressure applications including bioreactors and flue gas desulphurisation.

'The Pillaerator acquisition was an excellent fit due to both companies' high standards for product quality, innovative design, and energy efficiency,' said Peter Eckberg, Managing Director at Kaeser Compressors Australia. 'Pillaerator's simple and reliable design has a proven record for performance with units operating around the world, and we are already getting a lot of interest from our Australian wastewater partners.'

Available with flows from 133 up to 283 m<sup>3</sup>/min, Pillaerator blowers feature gas-tight, permanent magnet motors with active magnetic bearings, integrated frequency converters and closed-loop water cooling. Units are compact and quiet plus advanced controls offer full interoperability with SCADA systems.
